03 Core challenges & 03 key Approaches

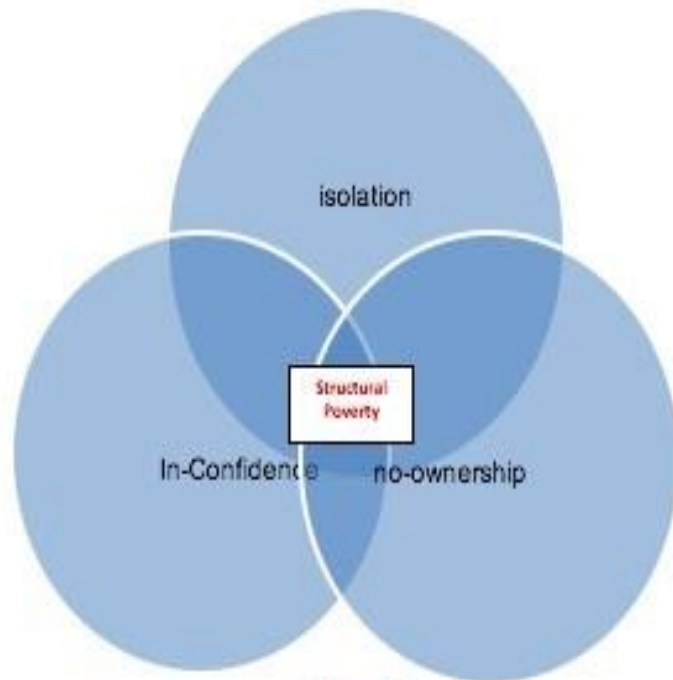

Figure 1

Social Policy & Ecology Research Institute (SPERI) was established on June 5th, 2006. It focuses on enriching *social*, *political*, and *ecological capital* within the highland ecosystem, where land, forests, and water are revitalized by IPs' wisdom, customs, and knowledge. This is achieved through SPERI's Livelihood Sovereignty Based Approach and an Integrated 6 – Thematic Action Network of the MECO-ECOTRA in association with YIELDS-AGREEE via HEPA Eco-Farming School in MeKong

IP Livelihood Sovereignty

- 5 Core Characteristics of Ecosystem
- Diverse – Unique – Inter – Adapt – Resilient
- 5 Fundamental Rights of Human Living
- Legitimacy living in Ecosystem.
- Nurturing Ecosystem
- Enriching Local Native Species;
- Practicing Local Wisdom & Experiences
- Go-Governing with Neighboring
